

Dr. Hasitha Tissera, MBBS, MSc, M.D.

Specialist Medical Epidemiologist, Epidemiology Unit, Sri Lanka. Dr. Tissera will be in charge of implementing the field study described in the proposal. He will also oversee data analysis and interpretation in consultation with the other Investigators. Dr. Tissera joined the central Epidemiology Unit in 2002 after

serving as a Regional Epidemiologist in the Eastern Province of Sri Lanka. His current primary responsibility includes Dengue surveillance and control at the national level. He received his Postgraduate training both at the Health Protection Agency – Centre for Infections (former PHLS) and the Department of Health, London in 2006/07.
